You must acknowledge the original author which is Eric, <http://www.bigocheatsheet.com>. Its good to collect likes but its better, moral and humane to credit people. Till now, there isn't much issue of web plagiarism which lets people easily copy things. But I thank you for at least helping people learn something. Your intention is right.

It doesn't quite look the same, I do prefer this one over the one on the website.

These tables are general knowledge. What is compiled here is different, though similar. This user's other post was a copy pasta, but I don't he took these from your referenced website.
